

ARCADIA

Elongate Seedless Watermelon with a Vibrant Rind

ARCADIA has an elongated shape and vibrant rind color that force all sets of eyes to be drawn to this seedless watermelon. With one taste of the dark red, crispy, delicious flesh you will have no doubt in your mind where the name for this watermelon came from. The firmness of Arcadia's flesh makes it the perfect watermelon for the cut trade. In our trials, this variety is consistently earlier, higher yielding and has the best eating quality.
